Contents Volume 19

Vol. 19, *No.* 1

Special Issue: Joint NTI/NUS Seminar on Materials Processing

Preface vii
Cropping of round aluminium alloy rods using torque and a narrow band of lateral compressive stress
S. Thiruvarudchelvan (Singapore) 1
PC-based computer aids in sheet-metal working
A.Y.C. Nee (Singapore) 11
Computer simulation of temperature fields in mechanised plasma-arc welding
S.C. Tam, L.-E. Lindgren and L.J. Yang (Singapore) 23
Hydrostatic bulging of adhesive-bonded laminates
H.M. Shang, F.S. Chau, V.P.W. Shim, C.J. Tay and S.L. Toh (Singapore) 35
Hydrostatic extrusion of wires
N.H. Loh and J.S.T. Cheung (Singapore) 45
Effect of punch clearance in the high-speed blanking of thick metals using an accelerator designed for a mechanical press
S. Jana and N.S. Ong (Singapore) 55
Analysis of the cutting process of a cylindrical workpiece clamped by a four-jaw chuck
M. Rahman (Singapore) 73
Towards enhancement of machinability data by multiple regression
S.H. Yeo, M. Rahman and Y.S. Wong (Singapore) 85
Optimisation of the surface finish produced by ball burnishing
N.H. Loh, S.C. Tam (Singapore) and S. Miyazawa (Tsukuba City, Japan) 101
Optimisation of the ECM–abrasive polishing of mild steel using response surface methodology
S.C. Tam, N.H. Loh (Singapore) and S. Miyazawa (Tsukuba City, Japan) 109
Dairy of Events 119

Vol. 19, *No.* 2

A study of cup–cup axisymmetric combined extrusion by the upper-bound approach
II. Prediction of defects
Wu Shichun and Li Miaoquan (Xi'an, P.R. China) 129
An examination of the relative merits of the compression test and the torsion test for the prediction of peak pressures during the extrusion of commercial purity titanium
S. Venugopal, G. Srinivasan, S. Venkadesan, V. Seetharaman (Kalpakkam, India) and P. Venugopal (Madras, India) 151
Physical modeling of the blocking process in open-die press forging
E. Erman, N.M. Medei, A.R. Roesch and D.C. Shah (Bethlehem, PA, U.S.A.) 165
Physical modeling of the upsetting process in open-die press forging
E. Erman, M.M. Medei, A.R. Roesch and D.C. Shah (Bethlehem, PA, U.S.A.) 195
Analysis of plane-strain rotational compression using the upper-bound method
K.H. Na and N.S. Cho (Seoul, South Korea) 211
Springback and side-wall curl of galvanized and galvalume steel sheet
J.K. Kim and P.F. Thomson (Clayton, Vic., Australia) 223
Fracture patterns in explosively compacted copper/graphite powder rods
A.G. Mamalis, G.N. Gioftsidis (Athens, Greece) and A. Szalay (Budapest, Hungary) 239

Short communications

Theoretical investigation of optimum clearance in blanking
P.B. Popat (Gujarat, India), A. Ghosh and N.N. Kishore (Kanpur, India) 251
A note on the determination of the friction factor by means of the reduction-capacity test
S. Venugopal, G. Srinivasan, S. Venkadesan and V. Seetharaman (Kalpakkam, India) 261
Diary Supplement 267

Vol. 19, *No.* 3

A retirement tribute
T.Z. Blazynski (Leeds, Great Britain) 273
Modelling of the interaction of slabbing mills during the simultaneous rolling of slabs in both roll-pairs
W. Dobrucki, R. Gregorczyk and S. Zawada (Kraków, Poland) 275
Laboratory investigation of the continuous seamless-tube rolling process (mandrel mill process) using models
W. Dobrucki and P. Sobkowiak (Kraków, Poland) 285
Experimental substantiation of rigid-plastic finite-element modelling of three-dimensional forming processes
M. Głowacki and M. Pietrzyk (Kraków, Poland) 295
Effects of microstructure on the mechanical properties and limit strains in uniaxial and biaxial stretching
F. Stachowicz (Rzeszów, Poland) 305
Designating the field areas for the contact of a rotary burnishing element with the rough surface of a part, providing a high-quality product
L. Kukiełka (Koszalin, Poland) 319
Geometry factor and redundancy effects in extrusion of rod
A. Farzad (Zahedan, Iran) and T.Z. Blazynski (Leeds, Great Britain) 357
Acknowledgement of Referees 373
